

7 mil optically clear decorative interlayer film for glass laminators, UV cured, scratch resistant, CMYKW

custom decorative solutions for glass laminators

Using an optically clear PET film interlayer printed using a high definition five colour printing process with CMYK and White UV inks which can be applied in 1 to 3 layers, allowing graphics to be viewed from both sides of the glazing yet still letting natural light flood through.

Warranty: 10 years (conditions apply)

Performance results are subject to variations within industry standards and are only intended for estimating purposes. Performance data is based upon film prior to printing.

key features

- Excellent optical clarity polyester interlayer (PET)
- High definition printed white in 1 to 3 layers
- HDLam can be laminated between 2 layers of glass using either by EVA, PVB or cold pour lamination processes
- 10 Year Warranty

performance data

visible light transmission (VLT)	89%
visible light reflection (VLR)	9%
glare reduction	1%
heat gain reduction	3%
shading coefficient (TSER)	.96
UV reduction (300-380 nm)	98%
total solar energy reduction (TSER)	17%
thickness	7 mil / 178 micron
